Staircase renovation in old buildings

Private house

A young family fulfils its dream of owning a home and acquires a 1960s property. The modernisation of the living area requires extensive renovation work. At the top of the to-do list is the outdated and uninviting entrance hall and stairwell. The aim is to create a new and original style of living through the use of natural wood decor and bright colours.

The existing wooden banister on the staircase with its characteristic panels is preserved, while the stringers, in-fill, and the new risers shine in modern white. The selected Toscana oak staircase decor looks particularly authentic with its branches. The reconditioned banister handrail completes the harmonious overall impression.

Staircase type:

Dog-leg landing staircase

Impressions:

Before

The slip resistance of the material, in standard R10, ensures a high level of slip safety and minimises the risk of falling, especially for children and the elderly.

The advantages at a glance:

- Anti-slip surface R10 over the entire staircase
- Authentic wood look, tangible structures
- Individual colour combinations possible for treads and risers

Decors:

Toscana Oak - decor-no.: 1246

Staircase - old building refurbishment

Private house

It's wonderful being at home within our own four walls, especially when we can make the interior decoration match our own wishes and needs. It creates a very special feel-good atmosphere, which can be wonderfully relaxing to be in.

In a major renovation, the warm wooden character of the Highland oak decor replaced cool and uncomfortable tile flooring from the 1970s. For a smooth transition between the staircase and living area, the floor is laid identically on both floors. The staircase now blends in harmoniously with the new style of living. The practical wiping strip provides a visually perfect wall finish. Decorative side panels hide the last visible parts of the old staircase and round off the look of the new gem of a staircase.

Staircase type:

Single-flight L-shaped staircase

Wiping strip / wall strip

(with surrounding matching ABS edge strip 700 x 200 x 8 mm)

- Protects the walls in the stairwell
- Facilitates cleaning and care
- Visually perfect wall finish
- Available in all trenovo homeline decors

This product is available in all our homeline decors. With the trenovo wiping and wall strip you get a perfect wall finish.

The advantages at a glance:

- Decoratively and structurally consistent for all stair components as far as the floor
- Protection of walls in case of wet stair cleaning with side wiping strip
- Step front edge proportional to the step height
- Modern warm decor creates a pleasant atmosphere

Decors:

Highland Oak - decor-no.: 1120

Staircase renovation in old buildings

Privat house

Modern and new was the wish of the young couple when they started planning the renovation of the stairs for their new home. Modern yes, but not new, is the solution of our staircase specialists!

Thanks to the trenovo staircase system for renovation and new construction, the extremely expensive purchase of a new staircase is simply no longer necessary.

The puristic decor Basalt dark with its colour shades fits perfectly into a modern interior design. Due to the use of a decor-identical privacy screen, nothing reminds you of the former unsightly wooden staircase.

Staircase type:

2x quarter-turned stairs

Structurally identical elements such as cheek panels and their covers complete the uniform appearance.

In addition to the optical effect, the installation of LED lamps also ensures greater safety when climbing stairs.

The advantages at a glance:

- The trenovo staircase system offers 100% decoration and structure uniformity for every available component
- Step depths from 48 mm for a discreet staircase exit up to the 690 mm deep corner step give you unlimited possibilities
- Extensive accessories such as LED light complete the range

Decors:

Basalt dark - decor-no.: 1171

Block steps

trenovo impressions

Homeline block steps

Who does not know them, the single stile/two stile or saddled stairs that came on the stair market in the 70s and 80s.

These steps are produced in the usual “trenovo homeline” quality with authentic surfaces according to your specifications. This allows you to adapt the stairs to their individual ideas and the current living ambience.

The custom-made block steps have a circumferential ABS edge, where you can choose between end-grain wood or longitudinal wood look.

Depending on your requirements, we offer the steps in 40 mm and 65 mm thickness. Decoratively identical accessories, such as laminate flooring for adjoining corridor areas, round off the range.

Product used: Provence Oak

The system - block step

Homeline block step

Precisely according to your templates or electronic data, we manufacture the complete steps in an assembly-friendly manner. It does not matter whether it is a straight or a drawn step. Whether corner cut-out or rounding. All components are ready for assembly, from the staircase entrance to the landing to the stair exit.

NEW

Homeline Solution

Homeline Solution by trenovo sets new standards in the field of stair renovation.

Leading national and international flooring manufacturers have been using this innovative surface in their flooring collection for quite some time.

We as a manufacturer follow this market penetrating trend!

Sustainability and healthy building are becoming increasingly important. The Homeline Solution surface covering is free of PVC multi-layer composite, the surface is extremely hard-wearing, robust and easy to clean.

Thanks to the multi-layer composite, trenovo step coverings are both elastic and warm to the feet. This increases walking comfort on the stairs, the adjacent corridor areas and ensures quiet and better acoustics in the staircase area. The slip-resistant surface provides a pleasant and safe walking feeling.

The 3D-effect of the decor gives the surface a deep and distinct decorative sharpness. As a result, it comes very close to natural materials such as wood and cement and looks absolutely authentic.

the wood decors impress with their special aesthetics and night-time appearance

healthy living

harmless to health, because free from PVC, chlorine and plasticizers

accessories

U-profile 8/68 and 8/83

You can use U-profiles to give open staircases a finish that's identical to the décor at the back, but these strips can also be used to cover strings in no time at all.

Size: 8 x 68 x 2700 mm

Size: 8 x 83 x 2700 mm

Side panel

The side panel with precision milled grooves can be used on both sides - the perfect solution for the side closure of the open step. For the cut edge of the risers of the risers use the WL 8 x 20

Size: 10 x 70 x 500 mm

Laminate strip 16 / 50 and AFL 19 / 60

The ideal solution for landing or areas in which you are laying laminate floors with an identical décor to the staircase. The understated, high-quality look gives you an attractive wall termination.

Size: 16 x 50 x 2700 mm – 19 x 60 x 2700 mm

Stringboard (MDF)

An ideal solution for covering the string using a stringboard identical to the décor. Highly abrasion-resistant, scratch-resistant and wear-resistant, to give you an attractive solution that keeps its value.

Size: 8 x 410 x 2800 mm

LED strip 22 / 45

Identical to the angle strip 22 / 45 in terms of profile, this strip delivers a decisive advantage: using the pre-made milling groove enables the LED staircase lightning to be integrated so that it cannot be seen.

Size: 22 x 45 x 2700 mm

Wiping strip / wall strip

(with surrounding matching ABS edge strip)

This product is available in all our homeline decors. With the trenovo wiping and wall strip you get a perfect wall finish. From the 200 x 700 format cut 2 wiping strips.

Size: 8 x 200 x 700 mm

First step

A perfectly finished first step is an eye catcher and at the same time extremely difficult to achieve. The precise prefabricated elements give you a high-quality and elegant appearance.

Size: Pentagonal 350 x 160 x 200 mm

Corner fillet 8 /20

The "small" corner fillet is the ideal solution to cover lateral cutting edges and open stairs.

Size: 8 x 20 x 2700 mm

Corner fillet 22 / 45

Corner fillet for the step bottom and installation aid. Perfectly prepared staircase elements allow a precise installation of the corner fillet 22/45.

Size: 22 x 45 x 2700 mm

accessories

Trenovo flooring:

Whether it is our CPL or our Solution collection, trenovo offers the 100% structure and decor identical flooring for all Homeline decors. This is the only way to ensure that the connection from the stairs to the adjacent corridor appears as if it is all of a piece. We manufacture our floors with the patented and easy to install Uniclic-system.

Trenovo insulating underlay:

This high-quality underlay provides an excellent reduction of walking and footfall sound. The integrated steam brake provides additional protection.

Decorative mouldings:

Our skirting board corners not only look decorative, they also ensure a permanently beautiful appearance. Especially an outside corner would quickly lose its charm without the protection of the cap due to the inevitable bumps with the vacuum cleaner. The cap's plug-in system eliminates the time-consuming mitre cut.

Suitable LED light system:

Light is an essential design element that can be wonderfully integrated into any staircase. Whether in the wall or the step, the trenovo lighting system creates atmosphere and safety.

Size: 70 x 70 x 7 mm

Power: = 0,5 W

Step transition profile:

With a height offset of up to 8 mm in the area of the staircase exit and the adjacent corridor area, the profile ensures a smooth transition.

Floor end profile:

This profile is used in case of a missing exit step of existing block staircases. This creates a decorative finish of the decor-identical flooring to the parapet.

Mounting tape including spacer:

This building authority approved adhesive tape simplifies the assembly of the block steps. Time-consuming drilling and screwing is not necessary. The spacers ensure a constant, uniform step support.

Take advantage of our **50 years of expertise** as a manufacturer of decorative interior finishing products!

To realize your ideas and projects, we offer you a spectrum of technical possibilities and customised solutions.

One for all
Our solution- interface for many applications.

ABS-edges identical to all our decors.

A perfect interaction of our possibilities. Minimalist and elegant, the modern folding staircase.

New Innovation
The perfect and authentic
side panel for open steps !

Tradition

BHK Holz- u. Kunststoff KG H. Kottmann is one of the leading manufactures of decorative interior products and furniture parts. From the beginning as a carpentry shop and transport company, BHK has developed into an international group of companies with production locations in Germany, the UK, Lithuania and Poland. These 50 years of experience gave us the competence to develop the trenovo staircase system in the year 2010. The trenovo system is the complete solution for new constructions and renovations. Its professionalism is not only shown in the surfaces. For you as a customer the trenovo system offers best material quality, short ways of communication, flexible reaction times and a perfected logistic.

Environment

At BHK we feel obligated as both people and as a company to do everything we can to preserve our resources and protect our environment. The trenovo staircase system and all other products are produced with great care and responsibility towards nature. In selecting materials we make sure that they are natural, demonstrate high quality and are manufactured in an environmentally sustainable manner. We use only wood materials that are sourced from sustainable forestry. This is demonstrated by the PEFC certificate. PEFC certified materials can be ordered on request. Our basic values are part of our system. For this reason, compliance with environmental guidelines, product quality and work safety in our facilities are audited at regular intervals. Since the year 2000 we have been certified in accordance with ISO 9001 and ISO 50001. We burn wood and paper waste in our own power plant and use the power generated for our heat and electrical power supply.
